

If you would like to save time on printing and distributing production and sales reports that are critical to lab performance, **Visual Cut™** is the answer. This is an additional program you may purchase that integrates with **Evolution** to provide more efficient reporting.

With **Evolution** and **Visual Cut™**, you can automatically generate and send reports to both internal and external recipients.

Some examples for internal purposes:

- Generate critical reports to specified people on a pre-set time frame (e. g., daily, weekly, monthly, quarterly, etc).
- Generate emails of the same internal report with the data filtered to the recipient's jurisdiction. For example sending account sales reports to sales personnel so they only receive the sales detail for the accounts associated to them.

Some examples for external purposes:

- Generate email invoice summary reports to large organizations requiring data in a specific format as shown below (e.g., VA, Heartland, NADG, TravelFlo).
